Green Butte Copper Company

HAER No. AK-9

Location: In Wrangell-St. Elias National Park & Preserve, on the east side of McCarthy Creek, approximately 12 miles northeast of the town of McCarthy, in Valdez-Cordova County, Alaska

UTM: 06.405006818100
06.405.300.6818100
06.404950.6818950
06.405400.6818900

Date of Construction: 1923-1925

Builder/Designer: Unknown

Present Use: Abandoned.

Significance: Originally staked by John Barrett, mine promoter and town father of McCarthy, this site is representative of the copper camps that sprung up near the productive Kennecott mine during the high metal market prices of World War I and the speculative 1920s. From 1922 to 1925, a few carloads of copper were extracted and, in 1926, the owners ceased production. Many artifacts and machinery remain in place because the site is remote and inaccessible, giving the appearance that the owners just closed the doors, intending to return the next season.
